

OUTSOURCING YOUR FLEET TO ADEPT

TESTIMONIALS AND AWARDS

165 vehicle fleet based in staffordshire

AVM worked very closely with us at Environmental Essentials to provide effective vehicle solutions management. We have daily onsite presence through a dedicated AVM account manager. She is a great asset to our business and she makes vehicle management easy offering expert advice and support to meet our business objectives. Since the Adept inplant joined the team we have seen considerable improvements in fleet management, in terms of cost savings, fleet efficiency and safety performance.

The in-plant works diligently to provide us with an excellent customer experience, which goes well beyond the industry standard. AVM really do put the customer journey at the forefront of their agenda. AVM understand our complex business needs, which is crucial when identifying key areas, across our regional locations to focus their efforts in terms of product selection and suitability, budget, user needs and turnaround times. We are a 24hr/365 days a year business and AVM provide us with a spot-on service, which is second to none.

AVM have also provided us with training packages, delivered direct to our people. This has enabled staff to understand the financial benefit of keeping a safe and fuel-efficient fleet. By providing us with this excellent service we have been able to engage with our staff across the business in what we are doing. Without the support of the Adept in-plant and her team we really would struggle to deliver an effective customer experience to our people.
