Commitment to achieving Net Zero

Adept Vehicle Solutions Limited is committed to achieving Net Zero emissions by 2050

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2022	
Additional Details relating to the Baseline Emissions calculations.	
<p>This is the first time we have reported our carbon footprint so this calculation establishes our baseline. It is based on our financial accounting year of April-April and has been calculated using the Financial control approach.</p> <p>Our Baseline calculation includes:</p> <ul style="list-style-type: none">• Scope 1: Direct Emissions• Scope 2: Indirect Emissions• Scope 3 Categories: 3: Fuel and energy related activities: 5: Waste generated in operations: 6: Business travel/Hotel stays: 7: Employee commuting/Teleworking: 8: Upstream leased assets: <p>Our Baseline deviates from the requirements under PPN 06/21 as follows:</p> <ul style="list-style-type: none">• Scope 3: Category 4: Upstream transportation & distribution: is not included as No 3rd party transportation or storage used. Scope 3: Category 9: Downstream transportation & distribution: is not included as No 3rd party transportation or storage used.• Scope 3: Category 3: Fuel and energy related activities: is included as Well to Tank emissions included for completeness. Scope 3: Category 8: Upstream leased assets: is included as Short-term hired replacement vehicles to cover servicing (included in CRP for completeness).

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to 937.6 tCO₂e by 2027. This is a reduction of 17.9 %

Progress against these targets can be seen in the chart below:
